Install eclipse

Download graphviz

Download plantuml and java parser 1.0.8 jar files

From the build path add the both the jars to the library

Create a jar of the program by - i. Right click on the project

                                 ii. export -> Java->Runnable JAR file->next-> finish

The jar file is now created

Open command prompt and navigate to the jar file

Now run the command "java -jar spushpersonal.jar C:\Users\SCS_USER\Desktop\uml-parser-test-1\uml-parser-test-1"

This command creates the class diagram in the folder where the java source code for the current class diagram is preset.
